

# PAVE KRAMER'S SKUNK SPRAY REMEDY

\* This formula was created in the early 90's by an Illinois chemist \*

## **1 Quart of 3% Hydrogen Peroxide**

(use *fresh unopened* hydrogen peroxide, hydrogen peroxide eventually turns into water)

## **¾ Cup of Baking Soda**

## **1 teaspoon Liquid Dish Soap**

- Combine the ingredients in an open container (**do not store in a sealed bottle -it will explode**)
- Bathe dog with regular shampoo first
- Using gloves, wash your dog again with lukewarm water and the mixture while the mixture is bubbling. Work the mixture well into the fur. Be sure to concentrate on the areas that were sprayed the most.
- **Keep mixture away from dog's face & eyes.** (If your dog has been sprayed in the face, try Tricotine Liquid Douche Concentrate or any over the counter douche).
- Let the mixture stay on your pet for 10-15 minutes before rinsing off.
- Rinse dog with lukewarm water, then repeat. Don't wash the mixture into your dog's eyes (use a washcloth to cover the eyes if you're rinsing the head).
- You may have to repeat the bath in a couple of days

After bathing, check your dog's eyes. If they are red and watering, your dog may have taken a direct hit in the face. Skunk spray won't blind the dog, but it's very painful.
